

Logistics Consultants, Logistics Outsourcing & 3pl Outsourcing

Henderson Logistics are often engaged to prepare cost and operating model concepts of logistics outsourcing and warehousing. This is compared with in house control to decide on the best strategy. For those already in an outsourced arrangement, Hendersons can conduct an independent performance audit or manage a tender process to test the market. Tenders are also frequently conducted for transport services, usually on a national basis with preparation of contract documents for engagement of the service provider. As logistics consultants, Hendersons are frequently called on to develop solutions for transport planning in cost and operating terms. Contract 3PL outsourcing solutions and transport effectiveness matters include the following.

- Contract warehouse operations
- 3PL warehousing
- Transport rates
- Line haul and metro planning
- Supply chain planning via third party
- Logistics outsourcing and agreement documentation
- Project management of transition to 3PL arrangements
