

## **Warehouse Consultants, Warehouse Layout & Warehouse Design**

Henderson Logistics are highly regarded as warehouse designers for new distribution centres. These skills are also applied to upgrade of existing facilities. All functions are addressed from receipt of stocks through to ultimate order despatch. Special focus is directed to warehouse design in storage modes, handling systems and best utilisation of space and headroom available.

Warehouse layout design will significantly affect performance especially in operator travel, materials handling and picking productivity. Equipment selection is critical with choices between conveyor solutions, barcode scanning, forklifts, RFI and many others that can determine best warehouse efficiency. Hendersons will ensure that the most effective operations are installed for any capital investment. Hendersons' skills are highly recognized for the following.

- Warehouse layout
- Warehouse design
- Distribution centre operations
- Materials handling
