

## **Outsourcing Warehouse and Transport**

Hendersons are often engaged to prepare a cost and operating model concept of third party contract warehousing. This is compared with in house control to decide on the best strategy in a partnership arrangement.

For those already in an outsourced arrangement, Hendersons can conduct an independent performance audit or manage a tender process to test the market.

Tenders are also frequently conducted for transport services, usually on a national basis with preparation of contract documents for engagement of the service provider.
